[2. 1: Comfortable and Inexpensive Life Jacket to Increase Wear](#)

Release Date: 01-24-2011Open Date: 03-05-2011Due Date: 08-05-2011Close Date: 08-05-2011

Background: In 2008, the U.S. Coast Guard received reports for 4,789 boating incidents; 3,331 boaters were reported injured, and 709 died. Among those who drowned, 9 out of 10 were not wearing life jackets (personal floatation device or PDF). Most boating fatalities that occurred during 2008 (72%) were caused by drowning with 90% of victims not wearing life jackets (Centers ...

[3. 2: Design and Test Standing Desks to Prevent Childhood Obesity](#)

Release Date: 01-24-2011Open Date: 03-05-2011Due Date: 08-05-2011Close Date:

08-05-2011

Background: Childhood obesity affects 23 million children in the United States. Seventy percent of overweight and obese youth become overweight and obese adults, which significantly increases the risk of hypertension, type 2 diabetes, kidney problems, heart disease, and certain types of cancer (Power, Lake & Cole, 1997; Dietz, 1998). Most school-based childhood obesity ...

4. [3: Where's the Salt? Purchasing of Lower Sodium Wholesale Products Made Easier](#)

Release Date: 01-24-2011 Open Date: 03-05-2011 Due Date: 08-05-2011 Close Date: 08-05-2011

Background: The majority of the U.S. adult population consumes more than 2 times their recommended maximum of daily sodium. Higher consumption of sodium strongly increases the risk of having high blood pressure which currently affects nearly 1 in 3 adult Americans, the majority of whom do not have it under control. High blood pressure is a leading risk factor for heart disease ...

6. [1: Cervical Cancer Control and Global Health: Rapid Point of Care Test for Human Papillomavirus Typing](#)

Release Date: 01-24-2011 Open Date: 03-05-2011 Due Date: 08-05-2011 Close Date: 08-05-2011

Background: With nearly 500,000 new cases and 274,000 deaths annually, cervical cancer is the second most common cancer among women worldwide. The understanding that persistent infection with one of ~15 high risk (HR) Human Papillomavirus (HPV) is required for cervical carcinogenesis led to the successful development of vaccines to prevent HPV infection as well as to recomm ...

[9. 1: Technologies to Reduce Unsafe Injections and Sharps Injuries](#)

Release Date: 01-24-2011Open Date: 03-05-2011Due Date: 08-05-2011Close Date: 08-05-2011

Background: The needle-syringe (N-S), invented 150 years ago, while invaluable in medicine, also pose several risks, primarily through intentional or inadvertent unsterile re-use, as well as through needlestick injury and improper waste disposal. These pose a substantial burden in resulting transmission of blood-borne pathogens (BBPs) in healthcare workers, patients and o ...

[10. 2: Controlled Antiretroviral Drug Release Systems for Systemic HIV Pre-exposure Prophylaxis](#)

Release Date: 01-24-2011Open Date: 03-05-2011Due Date: 08-05-2011Close Date: 08-05-2011

Background: The HIV/AIDS pandemic remains among our greatest public health challenges. More than a quarter century after the description of the first cases of AIDS, HIV has spread to virtually every country in the world infecting 65 million people and killing 25 million. The ongoing high incidence of HIV infection and the incomplete coverage with basic HIV prevention tools ...
